#### **HumiPad**

### **Liquid Humic Acid**

HumiPad contains both humic and fulvic acids, as well as added plant nutrients such as nitrogen, phosphorus, potassium and micronutrients in chelated form. It is made from a naturally occurring type of humic substances which is very rich in humic and fulvic acids with minimal impurities.

#### **Benefits**

- More yield and better quality.
- Improves assimilation and absorption of nutrients.
- Facilitates the formation and development of root system.
- Enhances the bioavailability of soil nutrient pools.
- Improves the soil fertility by enhancing its physical characteristics.
- Increased fertilizer retention
- Stimulate beneficial microbial activity
- increases Cation Exchange Capacity (CEC)

## Composition (W/V) %

Humic Acid	12
Fulvic Acid	3
K <sub>2</sub> O	3

# **Application rate**

Crop	How to use	Dosage	Time
Field Crops	Fertigation	5 – 10 Liters/ha	2 to 3 times at the beginning of the growing stages
Fruit trees	Fertigation	10 – 15 Liters/ha	2 to 3 times at the beginning of the growing stages
Crop seeds	Seed Treatment	1 liter in 10 liters of water for 100 kg of seeds	before planting
Roots of seedlings	Root Treatment	1 liter per 100 liters of water	before planting

Warning;

Do not mix HumiPod with acidic compounds
