

NutriPad 7-4-7+40%OM

Nutripod Granule 7-4-7 is in a series of granules mixed fertilizers with 40% organic content. Adjusted proportions of nitrogen, phosphorus and potassium, along with a high percentage of organic matter provides a complete and efficient package of nutrients needed for all agricultural products, especially fruit trees. The organic matter present in this fertilizer, in addition to supplying part of the nutrients required by the plant, improves the physical characteristics of the soil, and due to the improvement of the soil structure, it increases the permeability of water and air in the soil and increases water maintenance in the soil.

Benefits

- Supplier of soil organic matter
- Provision of nitrogen, phosphorus and potassium nutrients for all agricultural and garden crops

Composition (W/W) %

N	7
P ₂ O ₅	4
K ₂ O	7
OM	40

Application rate

Crop	How to use	Dosage	Time
Field crops	Spreading in the soil before plowing	150 – 300 kg/ha	Before or at the same time as sowing
Fruit trees	Soil Application	0.5 to 2 kg for each tree trunk	In winter or early spring
